[hiddn]™ Crypto Adapter

Turn any memory stick into a fully encrypted memory stick – hassle-free

Easy and secure encryption of any type of USB storage media

Dimensions:
Width 107mm x Length 90mm
x Height 30mm

- Protecting the content on your USB Memory Sticks and external harddrives has never been easier
- Transparent full disk encryption of all data
- The cost of losing your data is now reduced to the minimal cost of losing a low-price memory stick – demolishes the need for expensive encryption memory sticks as [hiddn]™ encrypts any storage media!
- Perfect solution for transportation of data between your office and your home office, between branches or anywhere else

  Share one common Crypto Adapter in meeting rooms for e.g. presentations and other data stored on USB memory sticks (common communication key for the company – separate encryption key per individual)
- Two-factor authentication for added security – User PIN code
- All encryption keys and security data stored on a separate smart card (Key Token)
- Connect the [hiddn]™ Crypto Adapter to your computer, insert the smart card, enter your PIN-code and start encrypting your data!
- Program and manage your own smart cards using the [hiddn]™ Key Management System
- Based on the FIPS Level 3 certified [hiddn]™ Crypto Module
